EDUCATION AND TRAINING

SRM University AP **Guntur, Andhra Pradesh, India**
BSc. in Computer Science *Expected Graduation, May 2025*

- **Concentrations:** Programming, Web development, Machine learning , Game development and Algorithms
- **Current CGPA:** 7.8/10.0
- **Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Architecture, Digital Literacy, Mathematical Modelling of Physical Data, Android App development, Database Management Systems, Web technologies, Machine Learning, Soft computing and AI

EXPERIENCE

Edunet Foundation **India**
Research Intern *June 2024 – July 2024*

- Analyzed car sales data and uncovered insights regarding vehicle depreciation, market trends, and factors affecting the resale value of cars.
- provide valuable information for potential car buyers, sellers, and dealers.

Prodigy InfoTech **Indla**
Software Developer *June 2024*

- Buit a robust and reliable library management system using python and tkinter library for UI
- Scraped e-commerce websites and got valuable insights
- Developed a sudoku solver that uses backtracking algorithms using java, java swing and awt for user interface

PROJECTS

Invoice Automation **Andhra Pradesh, India**
Team Lead *June 2024 – March 2024*

- Designed a desktop app that automates generation of business invoice using python
- Designed the UI of the app using tkinter library

Tide Share **Andhra Pradesh, India**
Team Lead *June 2024 – March 2024*
Tech Stack *Node.js, Express, React, Multer, Crypto, QR Code, Node Cache, MIME, FS, CORS*

- Developed a secure file-sharing web service that allows users to upload, encrypt, and download files using unique QR codes or six-digit codes.
- Implemented AES-256 encryption for file security and automatic decryption during download.
- Integrated QR code generation for seamless file retrieval via a secure download link.
- Utilized Node Cache to store file metadata and enforce single-use download links.

Studvize **Andhra Pradesh, India**
Team Lead *Nov 2024 – Dec 2024*
Tech Stack: *Node.js, Express, React, MongoDB, JWT, bcrypt, Mongoose, CORS*

- Developed a RESTful API for user authentication and task management using Node.js and Express.
- Implemented AES-256 encryption for file security and automatic decryption during download.

- Designed and optimized MongoDB schema using Mongoose, including embedded documents for task storage.
- Implemented CRUD operations for tasks, allowing users to add, retrieve, update, and delete tasks.
- Secured passwords using bcrypt hashing and applied best practices for API security.
- Successfully handled error management and improved API efficiency through proper indexing.

AI-Powered Chatbot API **Andhra Pradesh, India**
Team Lead *Nov 2024 – Dec 2024*
Tech Stack: *Node.js, Express, Axios, React, Cohere AI, dotenv, CORS, body-parser*

- Developed a RESTful API that integrates with Cohere's AI model to generate text responses based on user input
- Implemented secure API calls using axios to send prompts and retrieve AI-generated responses.
- Used dotenv to manage environment variables and secure API credentials.
- Deployed API with dynamic port configuration, making it adaptable for different environments.

Machine Learning Bitcoin Price Prediction **Andhra Pradesh, India**
Team Lead *Oct 2024 – Nov 2024*
Tools & Technologies: *Python, Scikit-Learn, XGBoost, Random Forest, Linear Regression, Pandas, NumPy, Matplotlib, Seaborn*

- Developed a predictive model to forecast Bitcoin closing prices using machine learning algorithms.
- Implemented feature engineering, time series analysis, and hyperparameter tuning to improve accuracy.
- Achieved R^2 score of 99% and MAPE of 98% on validation data.
- Applied K-Fold Cross-Validation to enhance model generalization.
- Conducted feature importance analysis to identify key predictors influencing Bitcoin prices.

Tetris Game **Andhra Pradesh, India**
Team Lead *March 2024 – March 2024*

- Created a clone of the famous Tetris game using c++
- Designed the UI of the game using the Raylib library for game development

Todolistify **Andhra Pradesh, India**
Team lead *March 2024 – April 2024*

- Developed a website that will enhance and manage individual to-do list using html, CSS, JavaScript and Express.js
- Designed a database that perform all CRUD operation to maintain the items in the to-do list using postgresql and node js
- Designed an authentication mechanism that allows multiple users to use the web and manage their to-do list

Library Management system **Andhra Pradesh, India**
Team Member *March 2024 – March 2024*

- Developed a robust desktop Library management system app using Java Swing
- Designed a database that retrieves books and student details using mySql

Pong Game **Andhra Pradesh, India**
Team Lead *March 2024 – March 2024*

- Created a replica of the famous pong game using c++

- Designed the UI of the game using the Raylib library for game development

Map of Nigeria Game **Andhra Pradesh, India**
Team Lead *February 2024 – February 2024*

- Created a desktop game that helps student learn the states in Nigeria and visualize the states on the map using python
- Designed the UI of the game using Tkinter library

Calorie Tracker **Andhra Pradesh, India**
Team Lead *January 2024 – January 2024*

- Created a desktop application that helps users track the number of calories they consume daily using python
- Visualize the calories in charts using matplotlib

SKILLS

Programming: C++, C, Java, Python, JavaScript , LaTeX, Html, SQL
Tools: Android Studio, Microsoft Office Suite, Raylib,Overleaf LaTeX, Photoshop, Eclipse, Git, Bootstrap, Node js, Express js, PostgreSql, React js, Postman
