EDUCATION AND TRAINING

SRM University AP **Guntur, Andhra Pradesh, India**
BSc. in Computer Science *Expected Graduation, May 2025*

- **Concentrations:** Programming, Web development, Machine learning , Game development and Algorithms
- **Current CGPA:** 7.82/10.0
- **Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Architecture, Digital Literacy, Mathematical Modelling of physical Data, Android App development, Database Management Systems, Web technologies, Machine Learning

EXPERIENCE

Edunet Foundation **India**
Research Intern *June 2024 – July 2024*

- Analyzed car sales data and uncovered insights regarding vehicle depreciation, market trends, and factors affecting the resale value of cars.
- provide valuable information for potential car buyers, sellers, and dealers.

Prodigy InfoTech **Indla**
Software Developer *June 2024*

- Buit a robust and reliable library management system using python and tkinter library for UI
- Scraped e-commerce websites and got valuable insights
- Developed a sudoku solver that uses backtracking algorithms using java, java swing and awt for user interface

PROJECTS

Invoice Automation **Andhra Pradesh, India**
Team Lead *June 2024 – March 2024*

- Designed a desktop app that automates generation of business invoice using python
- Designed the UI of the app using tkinter library

Tetris Game **Andhra Pradesh, India**
Team Lead *March 2024 – March 2024*

- Created a clone of the famous Tetris game using c++
- Designed the UI of the game using the Raylib library for game development

Todolistify **Andhra Pradesh, India**
Team lead *March 2024 – April 2024*

- Developed a website that will enhance and manage individual to-do list using html, CSS, JavaScript and Express.js
- Designed a database that perform all CRUD operation to maintain the items in the to-do list using postgresql and node js
- Designed an authentication mechanism that allows multiple users to use the web and manage their to-do list

Pomodora app **Andhra Pradesh, India**
Team Lead *December 2023 – December 2023*

- Created a desktop application that enhance concentration, and improve time management using python
- Designed the UI of the python turtle library

Library Management system **Andhra Pradesh, India**
Team Member *March 2024 – March 2024*

- Developed a robust desktop Library management system app using Java Swing
- Designed a database that retrieves books and student details using mySql

Pong Game **Andhra Pradesh, India**
Team Lead *March 2024 – March 2024*

- Created a replica of the famous pong game using c++
- Designed the UI of the game using the Raylib library for game development

Map of Nigeria Game **Andhra Pradesh, India**
Team Lead *February 2024 – February 2024*

- Created a desktop game that helps student learn the states in Nigeria and visualize the states on the map using python
- Designed the UI of the game using Tkinter library

Calorie Tracker **Andhra Pradesh, India**
Team Lead *January 2024 – January 2024*

- Created a desktop application that helps users track the number of calories they consume daily using python
- Visualize the calories in charts using matplotlib

Calculator **Andhra Pradesh, India**
Team Lead *July 2023 – July 2023*

- Created a replica of iPhone calculator using html, CSS and JavaScript

Tic-Tac-Toe **Andhra Pradesh, India**
Team Lead *February 2023 – February 2023*

- Created a desktop Tic Tac Toe game using java programming language
- Designed the UI of the game using AWT and Swing library

SKILLS

Programming: C++, C, Java, Python, JavaScript , LaTeX, Html, SQL
Tools: Android Studio, Microsoft Office Suite, Raylib,Overleaf LaTeX, Photoshop, Eclipse, Git, Bootstrap, Node js, Express js, PostgreSql, React js
